Senior Front-End Developer with over fifteen years of experience and deep skills in HTML, CSS and native JavaScript building for both mobile and responsive web. Professional development and design experience includes work for several well-known global restaurant brands. Passionate about helping users harness technology for a better life experience.

EXPERIENCE

Senior Front-End UI/UX Developer, Tillster, Inc. - Alpharetta, GA 2007 - present

Tillster (formerly Snapfinger Inc.) provides digital ordering solutions (on-site, web, and mobile) and advanced data analytics services for casual dining and quick service restaurants for over 100 customers that include Pizza Hut, Arby's, Burger King, KFC, and Baskin Robbins.

- Lead Front-End UI/UX developer for custom responsive web and AngularJS-based mobile projects supporting various brands on Tillster's proprietary .NET platform utilizing CSS3, HTML5, JS, Cordova, Ionic, Node.js, et al. .
- Team Lead for research, documentation, and presentation of improved processes and other identified digital mobile solutions. Serve as SME for Tillster's .NET platform front-end capabilities.
- Interface with Creative and Brand Marketing teams to assess, improve and implement UI/UX design concepts and wireframes across a variety of devices and media.
- Manage, curate and process brand assets including fonts, colors, images, and other media.

As Director, Web & Graphic Design, Snapfinger, Inc. (2007 - 2013)

- Implemented UI HTML web interfaces for Snapfinger clients including Outback Steakhouse, Carrabba's, California Pizza Kitchen, Bob Evans, Zaxby's and Firehouse Subs that generated over \$100M in combined online sales revenue.
- Designed online marketing campaigns, print advertising materials, and UI prototype wireframes.
- Applied UI/UX development functionality to solve business rules objectives and implement creative custom solutions tailored to client needs.
- Collaborated with key stakeholders to capture UX requirements and translate them into practical UI design solutions.
- Developed consistent UX standards across a myriad of devices and platforms.

Systems Analyst, CSX Technology - Jacksonville, FL 2001 - 2004

- Completed several development and design initiatives for CSX sales and marketing including an HTML intranet site, design of HTML UI wireframes for a proprietary app, and managing and maintaining database systems.
- Contributed to software QA testing, UAT, and end user support for commercial apps.

Assistant Web Manager, Department of Health - Tallahassee, FL 1998 - 2001

- Developed, managed and maintained HTML UI web pages for the entire Florida Department of Health (DOH) Internet and Intranet web sites (www.doh.state.fl.us).
- Designed web graphics, marketing materials, logos, and other media assets designated to represent various sections and aspects of the DOH Internet and Intranet web sites.
- Member of IT team dispatched by Governor Jeb Bush to implement comprehensive UI/UX redesign and migration of all DOH Internet and Intranet web sites.
- Recipient of 2000 Web Manager Award for Outstanding Service.
